EU citizen · Open to relocation (currently in Denmark)

github.com/dimitur2204

Summary

Frontend developer with 5+ years building production React and TypeScript, alongside a BEng in Software Technology (Jan 2027). Owns a shared component library and design system used by 15–20 engineers across 10 microfrontends. Self-hoster and homelab tinkerer outside work.

Experience

UNLwise , *Part-Time Frontend Developer*

02/2022 – Present | Aarhus, Denmark

- Own the technical direction and evolution of a shared component library.
- Lead the gradual modernization of the component ecosystem and improvement of the bundling process.
- Migrate from Semantic UI React toward headless and unstyled component solutions based on a Figma design system, while maintaining compatibility with existing applications and adhering to a high accessibility standard (WCAG 2.1 Level AA).
- Introduce a test suite, both unit with vitest and visual with Cypress
- Ship and maintain frontends within a complex microservices architecture, optimizing Docker workflows and configuring CI/CD pipelines to assist DevOps teams.
- Mentor interns and new frontend hires through code reviews, technical guidance, and frontend package development.

Podkrepi.bg , *Volunteer Fullstack Developer*

12/2021 – 05/2024 | Remote, Bulgaria

- Shipped 73 merged PRs across the frontend and backend features for a transparent IT community donation platform.
- Engineered the primary payment process and workflow using React/TypeScript with Next.js, Node.js, NestJS, and Prisma. Wrote automated visual and smoke tests in Cypress covering the donation journey
- Integrated Stripe APIs for card and recurring donations

Devasoft , *Frontend Developer*

05/2021 – 09/2021 | Sofia, Bulgaria

- Initiated and built an administration panel for a cloud provider platform using ReactJS/TypeScript, Redux, and React Bootstrap. Enabling admins to create the templates for provisioning virtual machines directly through the cloud marketplace.
- Led frontend development as the sole frontend engineer collaborating with three backend developers.

Klevret , *Junior Frontend Developer*

11/2020 – 05/2021 | Blagoevgrad, Bulgaria

- Developed CSS and JS for Umbraco themes or custom styled websites using complex SCSS. Used also jQuery, vue and C# templates.

Education

VIA University College ,

09/2023 – 01/2027 | Horsens, Denmark

Bachelor's in Software Technology Engineering (DK: ~10.4 - UK 1)

- Completing a bachelor's project on research about relating thymic health and other organ health in regards to biological age in people (inspired by [Thymic health consequences in adults](#) ). In collaboration with Aarhus University Hospital's radiology department.
- Done coursework and hands-on academic projects focused on embedded C programming, databases and backend systems.

Projects

Chivou — Landing Page & Onboarding Flow

- Developed a responsive landing page and secure onboarding flow for a startup.
- Architected a serverless form submission pipeline using Cloudflare Workers to ensure secure data handling. Using Airtable as a backend to capture and manage user data.

Homelab server

- Self-hosted Debian server running Nextcloud, Plex and Immich in Docker behind Tailscale, with InfluxDB/Grafana monitoring and automated BorgBackup.

Skills

React | TypeScript | Rollup | Vite | Storybook | Vitest | Playwright | Cypress | React Testing Library |
Webpack | Redux | Tanstack | Next.js | Git | C | Docker | Linux | Python | Java
